

Case Study

West Meadows Primary School

Located in a deprived area in South Yorkshire, West Meadows Primary School is one school out of a trust of nine.

The school has been using 1decision since March 2020, and Year 5 teacher and PSHE lead Dave Mitchell says that the students “love the resources. The early years students also love the colour drops, and the Keystage 1 children adore Deedee”.

“The Keystage 2 children really appreciate the topics that relate to them, such as e-safety and staying safe while outside. It’s given some children the confidence to disclose something about their private lives that they believe isn’t right.”

Asked if he would recommend 1decision to any other schools, Dave said; “100% yes!”

“The remote training and support I have received from 1decision from the beginning of covid through to present day has been unbelievable. I was new to leading a subject and Sarah was available for every ridiculous question I had!”

“And because of that support, PSHE is a subject to be proud of at West Meadows.”
